REFERENCE LETTER

We would like to express our satisfaction with the inspections in Chinese factories carried out by ExamineChina.

We regularly arrange quality checks during and after production at our Chinese suppliers.

The inspector follows our guidelines and performs very thorough inspections supported by detailed photos. We have been cooperating with suppliers for a long time, but the inspector pays attention to many details.

Thanks to inspections at the early stage of production, we can see errors that occur during production, and we can eliminate them.

Re-inspections allow us to ensure that the factory follows our comments and that the final product meets our requirements.

ExamineChina is a professional partner. Communication runs smoothly.

Inspection dates are always arranged in a timely manner. We quickly receive reports and photos after the inspection.

We recommend cooperation with ExamineChina to all importers.

REFERENCE LETTER

With this reference letter, we would like to express our satisfaction with the inspections in the Chinese factory that ExamineChina carried out.

ExamineChina inspector visited the factory of our Chinese supplier twice: before and after production of the ordered machine.

The factory inspection before production allowed us to confirm the supplier's credibility and make a decision regarding cooperation.

At a later stage, thanks to the precise quality control of the ordered machine, we made sure that it was working properly and was manufactured according to our requirements.

The inspector pointed out the issues with the machine, and we were able to clarify them with the supplier before shipping the product from China.

The inspection reports were very detailed. They contained a lot of photos and videos, thanks to which we had a full view of what the factory and manufactured goods look like.

We could count on the support and consultation of ExamineChina, both at the stage of import planning and after the inspection results.

We recommend cooperation with ExamineChina to all entrepreneurs who trade with China.

REFERENCE LETTER

We are very pleased with the factory inspection services in China that ExamineChina performed for us.

First, ExamineChina audited the factory before starting our cooperation with the supplier. It let us see how the manufacturing premises look and how the factory works – and we didn't have to go to China. Company documents were also verified.

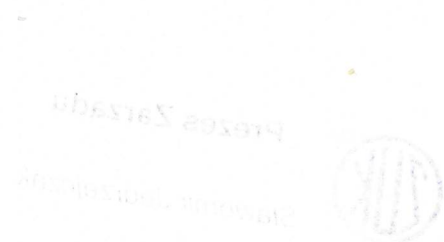

After the production, the ExamineChina inspector conducted a thorough quality control of the finished product. Due to our specific requirements for the goods, we have provided detailed inspection requirements. The inspector followed all instructions and carried out the inspection professionally. He took a lot of photos and wrote all his comments.

During the inspection, the inspector discovered defects in the product that would prevent its further sale. This allowed us to clarify quality issues with the supplier and correct defects at the factory. Thanks to quality control, we avoided the import of useless goods.

We confirmed that the manufacturer complied with our comments when the inspector revisited the factory and checked the corrected goods.

We could count on the support and advice from ExamineChina at every stage of cooperation with the Chinese factory.

We recommend using the services of ExamineChina to all entrepreneurs who trade with China.
